DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 37-41 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Re Claims 37 and 41 are nonfunctional-descriptive-material and not structurally or functionally interrelated to the medium. See MPEP 2105.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 37-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear whether Claim 37 is method or product claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2663

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1, 13, 15, 17-19, 31, 33, 35 and 36 are rejected under 35 U.S.C. 102(e) as being anticipated by Mehrabanzad et al U.S. Patent Number 6,404,807.

Re Claims 1 and 19, fig. 3, step 108 teaches MUa Modem (first device) negotiating appropriate transmission rate with user modem (second device). Step 112 teaches establishing a connection in responses the rate negotiation between the modems to exchange at the negotiated rate (See col. 5, line 59 +).

Re Claims 13, 15, 31, 33 refer to Claim 1, wherein the controller 24 monitors the exchanged information the connection between the modems (first and second device), step 114, and if the modem reports too many errors (supervisory message), then the exchange rate is renegotiated (See col. 6, lines 26-41), wherein the reported error inherently indicates the validation of the information message condition.

Re Claims 17, 35, refer to Claim 1, wherein modem supports packetized communication over Internet (See col. 4, lines 60-62).

Re Claims 18, 36, refer to Claim 1, V.90 modems (first and second devices) are serial communication.

Allowable Subject Matter

7. Claims 2-12, 14, 16, 20-30, 32, 34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2663

The following is a statement of reasons for the indication of allowable subject matter:

In combination with Claims 1 and 2; 19 and 20, prior art fails to teach the second device transmitting the synchronization acknowledgement message that includes the first exchange rate requested the first device and a second exchange rate.
